

Director: Leiyi William hong

Designer: Cindy Zhou

Overall, the site is set really well. And the Site architecture is really straight forward and easy to navigate.

Some suggestions:

- Change Tour – Date into ticket
 - For the panel under the concert poster, change the title into something ticket related, as there can be ticket purchase link for different countries.
- Make Aespa logo clickable
 - It's better to make the logo on the top left clickable, which more fit with the habit of normal people using the web, even though you have the Home link in the navigation bar.
- More content on the home page
 - You can include more content, like images, introduction and links on the Home page.
- Tour banner – more clear image
 - For the Tour page, try to find a concert image with higher resolution.
- Change album cover
 - For the Music page, you can change the music cover image into album cover image, which might fit well with each other. And since they all in square, it's easier for layout.
- Change typeface
 - Change the typeface of the webpage. Maybe some futurism and modern font on the body text and a more abstract font for the title.
